

We look forward to your joining our NSN instructors and fellow superintendents/irrigation managers at the next NSN Class. Pick a convenient time and location from our current schedules posted at toronsn.com and spectoro.com.

Between classes, be sure to utilize *Training in Ten™*, a series of precise-instruction training modules accessible on-demand, 24/7, in streaming video on the web. Since no downloading is required, bandwidth and slower internet connections are simply not an issue. You'll be ready to put your new or refreshed skills to work in ten-minutes or less!

We take training effectiveness very seriously, and believe that the real value of training is how well it prepares you to do the job. Our instruction combines step-by-step demonstration and hands-on exercises. We guarantee your satisfaction, whether you are starting at "square one" or if you are ready for accelerated learning.

"The instructor's knowledge and personal attention helped me better understand the answers to my specific questions. I was able to immediately put what I learned to work."

*Denver Edmunds, Grounds & Irrigation Supervisor
Ft. Worth Country Day School Ft. Worth, Texas*

TORO NSN is a vital service to the irrigation industry. More than 3800 customers worldwide choose NSN as their partner for confident daily operation of their computerized central irrigation control system. Toro NSN is more than a service — it's peace of mind knowing your landscapes and reputation stay protected from the results of technical failure.

Mastering SitePro®

Training for Your Central Control System

You can count on Toro NSN to provide just the right mix of training opportunities to help you master your SitePro central control system. Choose from:

- Basic and Intermediate Classroom Instruction at regional locations nationwide
- Advanced Classroom Instruction at the NSN Training Center, including field hardware and accessories in an operational "live" environment
- Learn as you go, self-paced instructional CDs with software simulation and demos
- Get trained and get going. In ten minutes or less, refresh or learn new skills with our no-cost, critical topic *Training in Ten™* modules available 24/7 on the web

NSN has over a decade of experience helping customers use their Toro systems successfully. Our training is delivered by top industry professionals who understand irrigation.

"This was one of the most applicable courses I have ever taken. My Club and I will benefit greatly!"

*KD Davis CGCS, Head Golf Superintendent
The Clubs of Cordillera Ranch Boerne, Texas*

NSN.

Basic 2-Day Regional Class

- Experience a screen-by-screen introduction to SitePro
- Build and edit a SitePro database
- Complete basic hydraulic and programming exercises
- Get familiar with station and program definitions
- Review ET and minutes to create run times
- Create specialized programs for ease of maintenance
- Learn about SitePro's powerful reporting options
- Explore the capabilities of manual system operation
- Overview of T.Weather® software with SitePro
- Learn about network hand-held radios
- View an introduction to Toro T.Map® and PRISM®

Step-by-step demos are combined with hands-on exercises using computers for each student. Instruction is delivered at a relaxed, productive pace.

Intermediate 2-Day Regional Class

- Advanced database management and protection
- Edit the SitePro Control System for optimum performance
- Learn how to create Site Codes to fine-tune your system
- Work with the most popular hydraulic setup methods
- Maximize efficiency by utilizing ET-generated run times
- Edit existing programs and station assignments
- Create and assign stations to supplemental programs
- Work with Start Times for maximum flexibility
- See how alarms and responses are setup in SitePro
- Demonstrate PRISM usage and techniques
- Operate a T.Map database to learn this powerful tool
- Learn about and program the new Multi-Manual feature
- Learn troubleshooting techniques
- Review major SitePro screens and functions

Registration for Regional Classes

1. Visit toronsn.com or spectoro.com for a current schedule.
2. Choose a convenient time and location.
3. Register with the distributor.

Advanced 3-Day Training Center Class

- Reduce time adding information & editing your database
- Quickly create & use site codes for fast management of unique stations
- Instantly make adjustments to groups of stations using site codes
- Discover shortcut keys that allow for faster access to many screen functions
- Learn expert techniques to optimize screen layouts for easy access and operation
- Save time by creating custom reports for fast access to system information
- Learn why you should be using the most under-utilized SitePro tools
- Create templates for data entry that make it easier, faster, and more accurate
- Master Auto-Programmer & cut program creation time in half
- In-depth building of Station and Master Groups for your specialized irrigation needs

Registration for Advanced Classes

1. Visit toronsn.com or spectoro.com for a current schedule.
2. Note training date for your specific platform.
3. Register via web/direct e-mail, or call toll-free 888-676-8676, Training option 2
